

Were noise walls considered?

- Noise walls are most effective where they are continuous and block a number of individual residences
- The short spacing between individual residences and driveways, as well as the need to maintain access along S.R. 108, make noise walls infeasible in Segments 1-7 (these segments include the area from Antelope Drive, extending north to 4000 South)
- Four noise walls were considered in Segment 8 under both action alternatives: (Segment 8 extends from 4000 South to 3600 South)
 - *Wall 1*: located on the southeast side of Karol's Mobile Home Park (about 550 feet long, 12-18 feet high)
 - *Wall 2*: located on the northeast side of Karol's Mobile Home Park (about 300 feet long, 12-18 feet high)
 - *Wall 3*: located on the south end of the Country Meadows Mobile Home Park (about 400 feet long, 12-18 feet high)
 - *Wall 4*: located on the north end of the Country Meadows Mobile Home Park (about 4,250 feet long, 12-18 feet high)
